To Our Customers . . .

SERIOUS SHORTAGES HAVE AND ARE CONTINUING TO DEVELOP IN ALL CLASSES OF NURSERY STOCK. WE STRONGLY URGE YOU TO EXAMINE YOUR REQUIREMENTS AND ORDER ANY ADDITIONAL ITEMS THAT YOU MAY NEED AT THE EARLIEST POSSIBLE MOMENT.

Two major factors have contributed to this condition. First a drastic reduction in supply caused by the serious freezes in the fall of 1950 which destroyed huge quantities of planting stock, and subnormal stands and growth caused by unfavorable weather conditions in the mid-west and south. Secondly an increased demand for nursery stock to plant new housing developments and economic conditions brought about by the Korean war which were favorable to our industry.

ROSES

All our roses are grown by men who have had long years of experience in growing roses. The land on which they are grown is carefully selected for its ability to produce a very fibrous root system and strong vigorous tops.

The buds are placed low on the understock thus eliminating "shanky" bushes and are nipped at just the right time to produce the maximum number of low branched canes.

Throughout the growing season they are fertilized regularly. After every rain or once per week, whichever would be most frequent, they are thoroughly dusted.

By following this pattern we are able to hold the foliage on our roses throughout the summer. Consequently they continue to grow through the summer, storing up food for winter storage.

They are dug only when thoroughly dormant and are transferred directly to iced cars for shipment to Shenandoah where they are carefully graded and placed in our modern cold storage until you request shipment.

OUR ROSES ARE GUARANTEED TO PLEASE

All roses are tied No. 1 and No. 1½, 10 per bundle No. 2, 25 per bundle. We do not break bundles.
